

Boerne City Campus Natural Area

In connection with the City of Boerne and other community organizations, the second project supported by the Boerne Parks Association involves the restoration and enhancement of the Boerne City Campus Natural Area (BCCNA). The BCCNA is comprised of 13-acres on either side of the Old No. 9 Trail, behind the library. The city and its partners are working towards restoring this area to a native pollinator habitat, creating a wildlife corridor and haven within the city.

The vision for this City property is to restore it to its natural state, teeming with native trees, shrubs, wildflowers, grasses, pollinator plants and with a functional riparian area. Wildlife, such as birds, butterflies, and small mammals will have a place that provides food, shelter and water for those species migrating through our area and for those who are permanent residents. Our human residents will have easy access from the Old Number 9 trail, the library and Main Street, by slipping into the natural refuge with hiking paths, allowing observation of diverse flora and fauna. This will be a place for relaxation, observation, and education for adults and children.

Even more important, however, this restored 13 acres will perform ecosystem services which are essential for all of us: supporting complex food webs, managing watersheds, moving carbon from the atmosphere to the soil, and supporting native pollinators which are responsible for 80% of our food. As we lose more and more beautiful Hill Country land to development, it becomes imperative that our landscapes, large and small, support these critical services. More information about this project is forthcoming, but we expect to be able to support this project both financially and with time, offer opportunities for members to volunteer for activities including clean up and replanting.

TREES & PLANTS

NATIVE TREES/PLANTS
 Ashe Juniper
 Black Willow
 Box-Orange (Diage-Orange)
 Boulder Maple
 Cedar Elm
 Hackberry
 Honey Locust
 Live Oak
 Mesquite
 Texas Redbud
 Soapberry
 Texas Mountain Laurel
 Prairie Falls Fouglove
 Chili Peppin
 Indiangrass
 Violet Family
 Prairie Coneflower
 Mealy Blue Sage

Cedar Elm

BOERNE CITY CAMPUS NATURAL AREA

BUTTERFLIES, MOTHS & OTHER POLLINATORS

BUTTERFLIES/MOTHS/POLLINATORS

- American Junco
- Banded Patch
- Common Blue
- Common Buckeye
- Common Oak North
- Delaware Cuckoo
- Dusky Blue Groundsquirrel
- Eastern Decapoda
- Gulf Fritillary
- Virginian Fritillary
- Gray Hairstreak
- Greenwood Hairstreak
- Honey's Duskywing
- Monarch
- Orange Skipperling
- Southern Skipperling
- Phaino Crescent
- Queen
- Queen's Mark
- Red-tailed Blue
- Red Admiral
- Common Skipper
- White Checkered Skipper
- Dawn Skipper
- Sleepy Orange
- Southern Dogface
- Dusky Sulphur
- Little Yellow Sulphur
- Orange Sulphur
- Black Swallowtail
- Checkered Setwing
- Swift Setwing
- Great Spreadingwing
- Eastern Amberwing
- Willow Skipper
- Eastern Tiger Swallowtail
- Pieris Swallowtail
- Viceroy Crescent
- Beech-bark Bee-eater
- Eastern Leaf-footed Bug
- Thread-waisted Sand Wasp
- Fire-bellied Red Paper Wasp
