

What's Growing Here?

These seedlings are a mix of Common and Butterfly milkweed plants that will help us create a Monarch Waystation here at the summit of Mount A.

Monarch Waystations are places that provide milkweeds and nectar sources necessary for monarchs to produce successive generations and sustain their migration.

Thank you to the Bonny Eagle Middle School 6th Grade Pathfinders for helping us first plant these seedlings with us as a volunteer project in May 2019!
