To: Donna Lawson – Long Pond Community Garden
Date: April 24, 2023
From: Barnstable Conservation Commission

Dear Donna,

I am pleased to announce the Town of Barnstable has joined the national Wildlife Federation Mayors Monarch Pledge, which is a commitment by Towns and Cities across the country to promote healthy and sustainable land management for Monarch Butterflies, specifically and other pollinators, in general. To assist with this endeavor, the Conservation Division has added the attached bulletin, created by our own Conservation Assistant Emil Assing, to our Conservation website with the hope of promoting Pollinator Gardens. I know your organizations' very existence already works toward increasing sustainability and that you have been planting species that are native and promote wildlife benefits in and around the gardens. We would encourage you to continue these activities and hope you might consider creating or enlarging a pollinator-friendly area at Long Pond Community Garden. If Conservation can be of assistance in this effort, please feel free to discuss with us.

Sincerely,

Edwin Hoopes
Conservation Agent
