Flag Status: Completed

Hello Consultants, Engineers, Landscape Architects and other interested parties;

We are pleased to announce the Town of Barnstable has joined the national Wildlife Federation Mayors Monarch Pledge, which is a commitment by Towns and Cities across the county to promote healthy and sustainable land management for Monarch Butterflies. To assist with this endeavor, the Conservation Division has added the attached bulletin, created by our own Conservation Assistant Emil Assing, to our Conservation website with the hope of promoting Pollinator Gardens. If you would like to consider incorporating a pollinator garden into your buffer zone mitigation planting area or maybe just like to add a pollinator garden, we would encourage this in consultation with Conservation staff. Please feel free to reach out with any questions you may have.

Thank you

Darcy Karle
Conservation Administrator
