

**RESOLUTION #121322-10**

**A RESOLUTION APPROVING THE APPLICATION FOR  
THE MAYORS' MONARCH PLEDGE**

WHEREAS, The National Wildlife Federation has established an initiative entitled the Mayors' Monarch Pledge, to aide in the protection, development, and maintenance of pollinator habitats within the community, and

WHEREAS, The Mayors' Monarch Pledge application cycle opens December 1<sup>st</sup>, 2022, and

WHEREAS, the Pleasant Hill City Council is supportive of this pledge to aide in the continued protection, development, and maintenance of pollinator habitats within the community, and

WHEREAS, one application from the City of Pleasant Hill will be submitted to the National Wildlife Federation for the Mayors' Monarch Pledge.

NOW, THEREFORE, BE IT RESOLVED by the Pleasant Hill City Council that the City of Pleasant Hill, Iowa, authorizes the application for the Mayors' Monarch Pledge.

Adopted this 13<sup>th</sup> day of December, 2022.

  
Sara Kurovski, Mayor

ATTEST:

  
Dena Spooner, City Clerk/Finance Director

## MAYORS MONARCH PLEDGE

### Mayors' Monarch Pledge

The monarch butterfly is an iconic North American species whose multigenerational migration and metamorphosis from caterpillar to butterfly has captured the imagination of millions of Americans.

We, the undersigned mayors and heads of local or tribal government, are deeply concerned about the decline of the monarch butterfly population. Both the western and eastern monarch populations have experienced significant declines. Less than one percent of the western monarch population remains, while the eastern population has fallen by as much as ninety percent. Monarch scientists attribute the population decline to degradation and loss of summer breeding habitat in the U.S., and loss of winter habitat in south-central Mexico and coastal California.

Cities, towns, counties, and communities have a critical role to play to help save the monarch butterfly. Municipalities can provide habitat at public parks, median strips, community gardens, schools, and municipal buildings like recreation centers and libraries. Events such as community workshops, native plant giveaways, and monarch festivals, can educate residents about the cultural significance of monarchs and how to create habitat. Simple changes in landscaping ordinances or other policies can make a big difference for the monarch too.

We recognize the importance of creating monarch and pollinator habitat at parks, gardens, and other green spaces, that every member of our community can equally enjoy. Our work to help save the monarch butterfly intentionally engages all parts of our communities, ensuring that historically marginalized communities are not left out of the work or the many benefits this work will create.

When mayors speak up and take a stand, our communities notice. Therefore, we hereby commit to help restore habitat for the monarch and encourage our residents to do the same, so that these magnificent butterflies will once again flourish across the continent.
