City of Pickering

Pickering, ON

Mayor Kevin Ashe

Pledge Summary

Over the past several years, Pickering has developed and implemented a number of initiatives to support the Monarch butterfly and other important pollinators such as birds, bats and bees. Through participation in the Mayors' Monarch Pledge, Pickering will continue to help create Monarch habitat, raise community awareness about the importance of these species, and educate residents on roles they can play. Through collaboration we also endeavor to encourage other Canadian cities to do the same.

Action Items Committed for 2025

Communications and Convening

- Launch or maintain a public communication effort to encourage residents to plant monarch gardens at their homes or in their neighborhoods. (If you have community members who speak a language other than English, we encourage you to also communicate in that language; Champion Pledges must communicate in that language.)
- Engage with community garden groups and urge them to plant native milkweeds and nectar-producing plants.
- Engage with gardening leaders and partners (e.g., Master Naturalists, Master Gardeners, Nature Centers, Native Plant Society Chapters , other long-standing and influential community leaders) to support monarch butterfly conservation.
- Engage with developers, planners, landscape architects, and other community leaders and organizers engaged in planning processes to identify opportunities to create monarch habitat.

Program and Demonstration Gardens

- Host or support a native seed or plant sale, giveaway or swap.
- Launch or maintain an outdoor education program(s) (e.g., at schools, after-school programs, community centers and groups) that builds awareness and creates habitat by engaging students, educators, and the community in planting native milkweed and pollinator-friendly native nectar plants (i.e., National Wildlife Federation's Schoolyard Habitats program and Monarch Mission curriculum).
- Add or maintain native milkweed and nectar-producing plants in gardens in the community.
- Launch, expand, or continue an invasive species removal program that will support the re-establishment of native habitat for monarch butterflies and other pollinators.

Systems Change

Created with the DynamicPDF Essentials Edition. [u89:v1.14.0.49966]

- Remove milkweed from the list of noxious plants in city weed / landscaping ordinances (if applicable).
- Increase the percentage of native plants, shrubs and trees that must be used in city landscaping ordinances and encourage use of milkweed, where appropriate.
- Reduce or eliminate the use of herbicides, pesticides, or other chemicals that are harmful to monarchs and pollinators and urban wildlife.

Action Items

In total, how many individuals have been reached through the Mayors' Monarch Pledge in your community this year (Jan-Dec)? Please limit your answer to only the number of individuals reached in the answer field below (Enter WHOLE NUMBERS only.).

1000

Of the total number of individuals engaged, how many youth (0-18) were reached through the Mayors' Monarch Pledge in your community this year (Jan. - Dec.)? If none, please write 0." (Enter WHOLE NUMBERS only.)

350

In total, how many acres of monarch habitat have been created in your city in the last 12 months? Please limit your answer to only the number of acres in the answer field below (e.g., 3). Note: 1 acre = roughly the size of a football field.

0.1

Where was the habitat created this year? Example locations may include residences, schools, places of worship, rights-of-way, roadsides, community gardens, shared public spaces, and more.

We added pollinator-friendly plants to our existing park pollinator gardens. It's difficult to quantify plants in resident yards.

How are you leveraging the Mayors' Monarch Pledge program to engage marginalized communities, such as low-income communities or communities of color?

n/a

What was your community's motivation for taking and continuing to work on the Mayors' Monarch Pledge?

Over the past several years, Pickering has developed and implemented a number of initiatives to assist not only the monarch butterfly, but also other pollinators. By participating in the Mayors' Monarch Pledge, we want to help these species, while also encouraging other Canadian cities to do the same.

What resources have been most helpful to you thus far and what new resources would you like to see to help meet your goals? What resources would be useful to help expand equitable engagement in community processes and access to high-quality, usable nature?

The news/updates we receive from the Mayors' Monarch Pledge are very helpful as it keeps us updated on the current trends in monarch conservation and what other municipalities are doing. We would like to learn about community-led invasive species control to help the survival of native, pollinator-friendly plants.

What else should we know about your monarch butterfly conservation efforts over the last year?

New this year we worked with community groups, and garden experts to host Environmental Day focused on pollinator awareness, education and conservation. The response from the participants and residents was very positive.

Selected Action Items

Launch or maintain an outdoor education program(s) (e.g., at schools, after-school programs, community centers and groups) that builds awareness and creates habitat by engaging students, educators, and the community in planting native milkweed and pollinator-friendly native nectar plants (i.e., National Wildlife Federation's Schoolyard Habitats program and Monarch Mission curriculum).

What program was launched or maintained to complete this effort? If you are involved with another National Wildlife Federation program, please mention that below. (Please include a link to the program, if possible)

Pickering Environmental Schools Grant

How many schools, community groups, leaders, or centers were engaged in this effort? How many of these collaborations and partnerships are "new"? (Enter WHOLE

NUMBERS only)

6

Please list the names of the schools you are working with.

St. Mary Catholic Secondary School Westcreek Public School William Dunbar Public School Pine Ridge Secondary School Elizabeth B Phin PS

What resources, if any, are you providing to educators?

We have a section for teachers on the City's website that provides them with a list of resources including activities, programs, educational links, and other helpful resources related to helping pollinators.

How many students and educators would you estimate are being reached? Please limit your answer to only number of adults and youths engaged in the answer field (e.g., 200 students and 20 educators).

Over 100

What community organizations, groups, or leaders (if any) did you partner with or engage to complete this effort?

Durham District Public School Board, Durham Catholic District School Board

How many acres of monarch and pollinator habitat have been planted through this effort? Please limit your answer to only the number of acres in the answer field below (e.g., 0.5 acres). For reference, 1 acre = 43,560 square feet and is about the size of a football field without the end zones. Note: 1 acre = roughly the size of a football field.

0.1

What is the maintenance schedule to ensure planted habitat is maintained?

As part of the grant guidelines, all schools are required to describe how their gardens will be maintained which varies based on the school project schedules.

Add or maintain native milkweed and nectar-producing plants in gardens in the community.

What community organizations, groups, or leaders (if any) did you partner with or engage to complete this effort?

High school students and Toronto and Region Conservation Youth Corps.

How many plants were planted? (Enter WHOLE NUMBERS only)

100

Please describe your effort in completing this action.

Volunteers from a local high school and Toronto and Region Conservation Authority's planted native, pollinator-friendly plants at a pollinator garden in Pickering. The Toronto and Region Conservation Authority Youth Corps volunteers help to maintain City pollinator gardens. The pollinator gardens help add diversity to the City's landscape, provide a food source, and enhance the natural habitat for pollinators.

Increase the percentage of native plants, shrubs and trees that must be used in city landscaping ordinances and encourage use of milkweed, where appropriate.

What community organizations, groups, or leaders (if any) did you partner with or engage to complete this effort?

The City Infrastructure Department

What is the status of this action? Please limit your answer to either "complete" or "in progress" in the answer field below.

In progress

If this action is In Progress, please describe your progress and a target date when you plan to complete action.

The Operations Department incorporates native plants and milkweed in their landscaping within the City gardens.

Launch or maintain a public communication effort to encourage residents to plant monarch gardens at their homes or in their neighborhoods. (If you have community members who speak a language other than English, we encourage you to also communicate in that language; Champion Pledges must communicate in that language.)

Please describe the methods of public communication below (e.g., printed materials, social media, print media).

We continuously promote sustainable related activities on the City's website (Pollinator Action) and social media (i.e. Facebook, Twitter, Instagram). This year this City also hosted several events which had a focus on supporting pollinators. The City also issued news releases, and eNewsletters for various pollinator initiatives and projects.

Engage with community garden groups and urge them to plant native milkweeds and nectar-producing plants.

Created with the DynamicPDF Essentials Edition. [u89:v1.14.0.49966]

Please describe the groups you engaged with and how you engaged with these groups below.

This year the City worked with local high school students to plant 100 pollinator plants in Pickering. The City also gave away 100 milkweed plants at its Environment Day event to encourage residents to plant milkweed in their own gardens.

Engage with gardening leaders and partners (e.g., Master Naturalists, Master Gardeners, Nature Centers, Native Plant Society Chapters , other long-standing and influential community leaders) to support monarch butterfly conservation.

How many community organizations and groups participated? Please list them below.

Toronto and Region Conservation Authority (TRCA), Durham Master Gardeners, Ontario Power Generation, and David Suzuki's Butterflyway Project.

Please describe the extent of engagement with these groups and their monarch butterfly conservation efforts.

During Earth Month, we work with expert horticulturalists from Durham Master Gardeners and TRCA to host a series of educational workshops including the importance of pollinators, and planting native, pollinator plants to support these populations. We also collaborated with TRCA, Ontario Power Generation, and David Suzuki's Butterflyway Project during the City's World Environment Day event to provide pollinator-focused learning activities and engage residents in monarch conservation.

Engage with developers, planners, landscape architects, and other community leaders and organizers engaged in planning processes to identify opportunities to create monarch habitat.

Please describe the extent of engagement with these groups and associated opportunities to create monarch habitat.

During review of development proposals, the City makes recommendation to incorporate native pollinator-friendly plant material. The City's Integrated Sustainable Design Standards (ISDS), includes mandatory and optional performance requirements for all new developments. These standards were developed in collaboration with staff, the development community and public. One of the ISDS performance criteria reflect the requirement to plant 50% native plant species, including trees, shrubs and herbaceous plants preferably drought-tolerant and pollinator friendly outside of the buffer area and within the development limits.

Host or support a native seed or plant sale, giveaway or swap.

How many plants were sold and/or given away at your event? (Enter WHOLE NUMBERS only)

Created with the DynamicPDF Essentials Edition. [u89:v1.14.0.49966]

300

How many people attended your event? (Enter WHOLE NUMBERS only)

500

What community organizations, groups, or leaders (if any) did you partner with or engage to host the event?

During City events related to sustainability (e.g. farmers' markets, sustainability pop-up events, town halls, educational roadshows, etc.) the City gives away free native wildflower seeds to participants. The City also gave away milkweed plants at its Environment Day event to encourage residents to plant milkweed in their own yards.

Launch, expand, or continue an invasive species removal program that will support the re-establishment of native habitat for monarch butterflies and other pollinators.

What is the total acreage of land treated to remove invasive plants? Note: 1 acre = roughly the size of a football field.

0.1

Please describe the extent of revisions or maintenance to invasive species removal programs, as well as the practices or techniques used to remove the invasive plants.

Volunteers from community gardens and the Toronto Conservation Youth Corp helped maintain pollinator gardens across the City. The pollinator gardens help add diversity to the City's landscape, provide a food source, and enhance the natural habitat for pollinators.

Remove milkweed from the list of noxious plants in city weed / landscaping ordinances (if applicable).

What community organizations, groups, or leaders (if any) did you partner with or engage to complete this effort?

City of Pickering Operations Department

What is the status of this action? Please limit your answer to either "complete" or "in progress" in the answer field below.

Complete

If this action is Complete, please include the date it was completed and share a 1-2 sentence description. Please include a copy of the policy by uploading or linking below.
