

City of Dalworthington Gardens

Dalworthington Gardens, TX

Mayor Laurie Bianco

Pledge Summary

The City of Dalworthington Gardens, Texas is a rural oasis in the heart of the Dallas-Fort Worth metroplex. The City covers an area of almost 2 square miles and has a population of approximately 2,200. A 43-acre park includes a lake and offers a chance for people to relax and enjoy being in nature. Mayor Bianco of Dalworthington Gardens first took the Mayor's Monarch Pledge in 2019. Eight action items were pledged to qualify the City as part of the Leadership Circle, a status that we continue to work to maintain to raise awareness in the community and encourage conservation practices to support the monarch butterfly. A garden in Gardens Park was reworked in response to one of the first year's action items. It now better supports monarch butterflies on their migration and has received designation as a Monarch Waystation.

Action Items Committed for 2024

Communications and Convening

- Issue a proclamation to raise awareness about the decline of the monarch butterfly and the species' need for habitat. This proclamation must incorporate a focus on monarch conservation.
- Launch or maintain a public communication effort to encourage residents to plant monarch gardens at their homes or in their neighborhoods. (If you have community members who speak a language other than English, we encourage you to also communicate in that language; Champion Pledges must communicate in that language.)
- Create a community art project to enhance and promote monarch and pollinator conservation as well as cultural awareness and recognition.

Program and Demonstration Gardens

- Host or support a native seed or plant sale, giveaway or swap.
- Facilitate or support a milkweed seed collection and propagation effort.
- Plant or maintain a monarch and pollinator-friendly demonstration garden at City Hall or another prominent or culturally significant community location.
- Initiate or support community science (or citizen science) efforts that help monitor monarch migration and health.
- Display educational signage at monarch gardens and pollinator habitat.
- Add or maintain native milkweed and nectar-producing plants in gardens in the community.

Action Items

In total, how many individuals have been reached through the Mayors' Monarch Pledge in your community this year (Jan-Dec)? Please limit your answer to only the number of individuals reached in the answer field below (e.g., 50).

200

Of the total number of individuals engaged, how many youth (0-18) were reached through the Mayors' Monarch Pledge in your community this year (Jan. - Dec.)? If none, please write 0." (Only allow numerical values.)

100

In total, how many acres of monarch habitat have been created in your city in the last 12 months? Please limit your answer to only the number of acres in the answer field below (e.g., 3).

0

Where is your habitat being created? This may include residences (yards, containers, balconies, etc.), schools, places of worship, rights-of-way, roadsides, community gardens, culturally-significant locations, shared public spaces and common areas or parks.

No additional habitat was created on public property and we do not have data collection to capture habitat created by citizens on their private property.

How are you leveraging the Mayors' Monarch Pledge program to engage marginalized communities, such as low-income communities or communities of color?

We are equal opportunity when it comes to engagement but we do not specifically target any one group, marginalized or not.

What was your community's motivation for taking and continuing to work on the Mayors' Monarch Pledge?

We understand the need to raise awareness to encourage citizens to help the monarch population. We understand the importance monarchs play within the ecosystem, especially with the excessive heat we experienced this past summer. Furthermore, the Mayor's Monarch Pledge fits with our tag line and city's culture: "A rural oasis in the heart of the metroplex".

What resources have been most helpful to you thus far and what new resources would you like to see to help meet your goals? What resources would be useful to help expand equitable engagement in community processes and access to high-quality, usable nature?

Information from National Wildlife Federation and MonarchJointVenture.org have been very helpful. We also used Native American Seed to purchase our butterfly retreat seed mix passed out to the public. No other resources to request at this time.

What else should we know about your monarch butterfly conservation efforts over the last year?

We have increased our efforts to educate citizens through our newsletter, educational bookmarks, and butterfly seeds distribution. This year we even partnered with a neighborhood elementary school to assist in various aspects. We are unable to completely capture data on how many people we impact with our efforts as we use multiple sources to reach the community. Those sources include social media, newsletters, City-sponsored events, and kiosk postings.

Selected Action Items

Initiate or support community science (or citizen science) efforts that help monitor monarch migration and health.

How many estimated individuals participated in your community science effort? Please limit your answer to only the number of individuals reached in the answer field (e.g., 150).

100

What community organizations, groups, or leaders (if any) did you partner with or engage to complete this effort?

We engaged with local citizens within Dalworthington Gardens through our monthly newsletter.

Please describe the community science program that you supported or initiated. Provide a link to any relevant programs, if possible.

We engaged with local citizens withing Dalworthington Gardens through our monthly newsletter to document the monarch migration. We provided the link to the monarch

tracking website to citizens so they could report their observations throughout the monarch migration season.

Issue a proclamation to raise awareness about the decline of the monarch butterfly and the species' need for habitat. This proclamation must incorporate a focus on monarch conservation.

Date of Proclamation:

March 21, 2024

Title of Proclamation (i.e. – Monarch Day or Pollinator Week):

A Proclamation by the Mayor of the City of Dalworthington Gardens

Upload a copy of your proclamation.

How many plants were sold and/or given away at your event?

200+

How many people attended your event?

200

What community organizations, groups, or leaders (if any) did you partner with or engage to host the event?

We partnered with a member of DWG's City Council and the President of the Friends of DWG Gardens club to help pass out the seed packets throughout various Park Board events hosted in the City. We partnered with elementary student volunteers from Arlington Classic Academy who helped put together the seed packets for our events.

Launch or maintain a public communication effort to encourage residents to plant monarch gardens at their homes or in their neighborhoods. (If you have community members who speak a language other than English, we encourage you to also communicate in that language; Champion Pledges must communicate in that language.)

Upload any relevant documents, images, or other attachments related to your effort on this action.

Please describe the methods of public communication below (e.g., printed materials, social media, print media).

The DWG Park Board has encouraged residents to plant monarch gardens at their residences through our City's monthly newsletter. We highlighted the migration of the monarch butterflies and asked residents to support the monarchs by planting nectar and native milkweed plants. In addition to the newsletter, we also have several informational flyers posted in all the kiosks located along the walking path in Gardens Park. We communicate with citizens during our sponsored events (National Night Out, Trunk-or-Treat, Earth Day, etc.) to encourage residents to plant similar plants at their homes. Finally, bookmarks and brochures with educational information related to monarchs were passed out during the city-sponsored events.

Display educational signage at monarch gardens and pollinator habitat.

Upload any relevant documents, images, or other attachments related to your effort on this action.

How many garden signs are being displayed and where are they located?

4

Please describe the educational information on the sign(s), and provide any links to externally purchased sign(s).

The signage we have posted include educational information about the monarch butterflies' migration pattern, their habitats, and the type of pollinators that can be planted to encourage pollinating. The information is posted in our public park inside our kiosk

Plant or maintain a monarch and pollinator-friendly demonstration garden at City Hall or another prominent or culturally significant community location.

Where is the demonstration garden located and how does this location relate to the cultural significance of the monarch (if relevant)? (Please provide an address or

coordinates, if possible)

The demonstration garden is located in Gardens Park off California Lane between Roosevelt Dr. and Park Dr. It borders one side of part of the main path around the park and both sides of a walkway leading up to our gazebo and playground. The Gardens Park is the sole park within the City of Dalworthington Gardens.

What community organizations, groups, or leaders (if any) did you partner with or engage to complete this effort?

In 2019, the Horticultural Club from Tarrant County College designed a new look and helped refurbished an existing garden. The DWG Park Board members, staff of DWG, members of the Friends of DWG Garden Club, and several citizen volunteers have helped maintained the gardens. In 2024, a local business repaired the irrigation in the garden and donated several native plants to the existing Monarch Garden.

What is the size of the demonstration garden (in acres)? Please limit your answer to only the number of acres in the answer field below (e.g., 0.5 acres). For reference, 1 acre = 43,560 square feet and is about the size of a football field without the end zones.

How many people attended your event?

3

What species were collected or propagated?

We collected seeds of the species of *asclepias viridis* from a local resident's field.

What community organizations, groups, or leaders (if any) did you partner with or engage to host the event?

We partnered with a member of DWG's City Council and the President of the Friends of DWG Gardens club to collect the seeds. Partnered with a local citizen and their elementary student to help with propagation effort.

Please describe the milkweed seed collection and propagation effort that you hosted.

After identification, the milkweed was collected from a local resident's field. We engaged with a member of DWG's City Council and the President of the Friends of DWG Garden club to separate the milkweed seed from the fluffs. We also expanded our propagation effort from the previous year and broadcasted the collected milkweed into the wildscape located within our park and also a citizen's individual home.

Add or maintain native milkweed and nectar-producing plants in gardens in the community.

Upload any relevant documents, images, or other attachments related to your effort on this action.

What community organizations, groups, or leaders (if any) did you partner with or engage to complete this effort?

We engaged with a member of City Council and the President of the DWG Garden club.

How many plants were planted?

5

Please describe your effort in completing this action.

The milkweed seed collected for propagation were shared with citizens within DWG to plant within their home gardens. We also passed out nectar-producing seeds throughout our various Park Board events. Unable to quantify the number of plants that were produced from the seeds. However, one citizen shared photos from the plants grown in her garden thanks to the knowledge gained from the Park Board.

Create a community art project to enhance and promote monarch and pollinator conservation as well as cultural awareness and recognition.

Upload any relevant documents, images, or other attachments related to your effort on this action.

What community organizations, groups, or leaders (if any) did you partner with or engage to host the event?

We partnered with citizens within our city of Dalworthington Gardens and surrounding areas. We also partnered with a nearby elementary school (Arlington Classic Academy) and had student volunteers put together take-home kits for our art project. for the art

How many individuals were engaged in this effort? Please limit your answer to only the number of individuals reached in the answer field (e.g., 50).

60

Please describe the community art project that was implemented in your community and how it contributed to cultural awareness and recognition (e.g., number of art installations, type of art).

We created a Monarch lifecycle art project for citizens to create during our annual Easter event. We set up a display table with education information related to Monarchs. We normally set up an art project table as well with all supplies need to create the project, but unfortunately due to adverse weather conditions we had to move our project indoors. However, we adapted and provided the art project supplies in a take-home kit. A local kindergarten class also took part in the art project at their school.
