Town of Lamoine

Lamoine, ME

Select Board Member and Conservation Commission Chair Larissa Thomas

Pledge Summary

Lamoine is a town of around 1,800 on the coast of Maine. We joined Mayors' Monarch Pledge in 2023 and have been building the program each year. We have established pollinator gardens in two locations on town property, we have also planted milkweed in a third location. We have offered four free seed giveways; we have had seedling sales; we have hosted education events with guest speakers, including a seed sowing workshop; we have partnered with the school on a program involving planting milkweed and learning about pollinators; we have partnered with a restaurant, planting milkweed varieties there; and we have been messaging through the town's quarterly newspaper. There is broad community support for our efforts.

Action Items Committed for 2026

Communications and Convening

- Issue a proclamation to raise awareness about the decline of the monarch butterfly and the species’ need for habitat. This proclamation must incorporate a focus on monarch conservation.
- Launch or maintain a public communication effort to encourage residents to plant monarch gardens at their homes or in their neighborhoods. (If you have community members who speak a language other than English, we encourage you to also communicate in that language; Champion Pledges must communicate in that language.)

Program and Demonstration Gardens

- Host or support a native seed or plant sale, giveaway or swap.
- Facilitate or support a milkweed seed collection and propagation effort.
- Plant or maintain a monarch and pollinator-friendly demonstration garden at City Hall or another prominent or culturally significant community location.
- Convert vacant lots to monarch habitat.

Action Items

In total, how many individuals have been reached through the Mayors' Monarch Pledge in your community this year (Jan-Dec)? Please limit your answer to only the number of individuals reached in the answer field below (Enter WHOLE NUMBERS only.).

100

Of the total number of individuals engaged, how many youth (0-18) were reached through the Mayors' Monarch Pledge in your community this year (Jan. - Dec.)? If none, please write 0." (Enter WHOLE NUMBERS only.)

25

In total, how many acres of monarch habitat have been created in your city in the last 12 months? Please limit your answer to only the number of acres in the answer field below (e.g., 3). Note: 1 acre = roughly the size of a football field.

0

Where was the habitat created this year? Example locations may include residences, schools, places of worship, rights-of-way, roadsides, community gardens, shared public spaces, and more.

We did not create any new habitat this year, but we added plants to areas created in the previous two years. The public areas containing monarch habitat that we created are at the town hall, school, and transfer station. We assume that people have created monarch habitat in their own yards using seeds from our seed giveaway and seed sowing workshop (and seedling sales in the previous years along with seed giveaways each year), but we have no way of quantifying that.

How are you leveraging the Mayors' Monarch Pledge program to engage marginalized communities, such as low-income communities or communities of color?

Lamoine is not very racially diverse, so we did not conduct any outreach among communities of color. We did seeds free of charge and held a seed sowing workshop where all the materials and seeds were provided free of charge, so there was no barrier to participation. General, unscientific observation of the participants at the workshop and those taking seeds from the basket at town hall suggests that a cross section of the community spanning the income scale took part in the program.

What was your community's motivation for taking and continuing to work on the Mayors' Monarch Pledge?

Created with the DynamicPDF Essentials Edition. [u181:v1.14.0.49966]

To support struggling populations of monarch butterflies and other pollinators and to engage fellow citizens in activities that will have a positive impact that they can see with their own eyes.

What resources have been most helpful to you thus far and what new resources would you like to see to help meet your goals? What resources would be useful to help expand equitable engagement in community processes and access to high-quality, usable nature?

Thus far, we have been able to maintain an adequate amount of volunteer participation to keep the demonstration gardens looking fantastic. The demonstration garden at the entrance to the town hall in particular serves as an advertisement for all of our Mayors' Monarch Pledge work, and makes the case for the value and attractiveness of native plantings that (hopefully) people are implementing in their own gardens. It will be a challenge over time to maintain enough people who are willing to regularly give time watering and weeding to keep the gardens looking good.

What else should we know about your monarch butterfly conservation efforts over the last year?

The projects in Lamoine have received a lot of publicity and the response is overwhelmingly positive. We have been able to build support for natural resource conservation by improving the town's public spaces at no cost and offering no-cost opportunities for people to enrich their local backyard landscapes. The work has contributed to our town's sense of community and for some, offered optimism about our ability to make a positive impact in the part of the world we can touch.

Selected Action Items

Issue a proclamation to raise awareness about the decline of the monarch butterfly and the species' need for habitat. This proclamation must incorporate a focus on monarch conservation.

Date of Proclamation:

January 9, 2026

Title of Proclamation (i.e. – Monarch Day or Pollinator Week):

Mayors' Monarch Pledge Day in Lamoine

Upload a copy of your proclamation.

Lamoine MMP proclamation 2026.pdf

Launch or maintain a public communication effort to encourage residents to plant monarch gardens at their homes or in their neighborhoods. (If you

Upload any relevant documents, images, or other attachments related to your effort on this action.

Seed sowing wkshp 2026.jpeg

Please describe the methods of public communication below (e.g., printed materials, social media, print media).

Information about Lamoine's Mayors' Monarch Pledge projects and opportunities for individual citizens to participate in growing monarch host plants and other native plants were presented in the town's quarterly newspaper. Special events such as the free seed giveaway and seed sowing workshop were announced on the town's Facebook page. The seed sowing workshop provided an opportunity to provide more detailed information about gardening to support monarchs and other pollinators. See attached articles and image from seed sowing workshop.

Host or support a native seed or plant sale, giveaway or swap.

Upload any relevant documents, images, or other attachments related to your effort on this action.

Seed giveaway 2025.jpeg

How many plants were sold and/or given away at your event? (Enter WHOLE NUMBERS only)

175

How many people attended your event? (Enter WHOLE NUMBERS only)

30

What community organizations, groups, or leaders (if any) did you partner with or engage to host the event?

We gave away about 175 seed packets for nine plants species (three of which are monarch host plants) and then held a seed sowing workshop attended by about 30 people.

Created with the DynamicPDF Essentials Edition. [u181:v1.14.0.49966]

The event was advertised at our local school, in the local newspaper, and on the town's Facebook page.

Facilitate or support a milkweed seed collection and propagation effort.

Upload any relevant documents, images, or other attachments related to your effort on this action.

Town Hall caterpillars 8-6-26.jpeg

How many people attended your event? (Enter WHOLE NUMBERS only)

3

What species were collected or propagated?

Asclepias syriaca, Asclepias incarnata, Asclepias tuberosa

What community organizations, groups, or leaders (if any) did you partner with or engage to host the event?

This was entirely carried out by the Lamoine Conservation Commission.

Please describe the milkweed seed collection and propagation effort that you hosted.

The previous fall, seeds were collected from the Mayors' Monarch Pledge gardens at town hall and the school and from gardens of Conservation Commission members, including seeds for common milkweed, butterfly weed, and swamp milkweed. Some of those seeds were prepared, packaged, and distributed through the seed giveaway and seed sowing workshop. Some of the seeds were retained by Conservation Commission members and raised as seedlings in the spring and then planted in the pollinator gardens we previously established as part of Mayors' Monarch Pledge at the town hall and school, adding more plants to the gardens created in prior years. The common milkweed seeds also were direct sowed at the town's transfer station to help increase the number of plants there beyond those the Conservation Commission planted in previous years.

Plant or maintain a monarch and pollinator-friendly demonstration garden at City Hall or another prominent or culturally significant community location.

Upload any relevant documents, images, or other attachments related to your effort on this action.

Lamoine Town Hall sign monarch butterfly.jpeg

Where is the demonstration garden located and how does this location relate to the cultural significance of the monarch (if relevant)? (Please provide an address or

coordinates, if possible)

There are two demonstration gardens. One is at the town hall, with plantings in beds flanking the entrance, which are highly visible for everyone coming to the building. There is also a side planting area where the monarch host plants are located, because there are better places for monarchs to pupate in that area. A second demonstration garden is at the school, bordering the parking lot, and visible to people passing along the road and those parking at the school. The town hall is located at 606 Douglas Highway, Lamoine, ME 04605. The school is located at 53 Lamoine Beach Road, Lamoine, ME 04605.

What community organizations, groups, or leaders (if any) did you partner with or engage to complete this effort?

none--this was a Conservation Commission project supported by some additional volunteers

What is the size of the demonstration garden (in acres)? Please limit your answer to only the number of acres in the answer field below (e.g., 0.5 acres). For reference, 1 acre = 43,560 square feet and is about the size of a football field without the end zones. Note: 1 acre = roughly the size of a football field.

0.01

Convert vacant lots to monarch habitat.

Upload any relevant documents, images, or other attachments related to your effort on this action.

How many lots were converted to monarch habitat? Please limit your answer to only the number of lots in the answer field below (e.g., 3)

1

Please describe when the lots were converted to monarch habitat and the planned maintenance schedule.

We began planting common milkweed at the transfer station in 2023. It has been difficult to get the plants established because the soil in our target area is very gravelly sand that does not retain moisture. The transfer station is located in a played out gravel pit. We have been experimenting with different methods to support the plants, and have had some success over time; but this year, we experienced a serious drought, and it is only feasible to bring a small amount of water by hand once a week to water the plants. As a result, at a certain point, most of the milkweed died. We will continue to augment the existing plantings there; we plan to bring common milkweed seeds this fall along with Joe Pye Weed, and possibly other drought tolerant native plant species.
