

City of Angleton

Angleton, TX

Mayor Jason Perez

Pledge Summary

Angleton, the County Seat of Brazoria County, prides itself on community spirit and a small-town atmosphere within the Houston metropolitan area. Angleton is approximately 11.3 square miles in size and has a very diverse population of just under 20,000 residents. Mayor Perez of Angleton, TX has committed to saving the monarch butterfly and other pollinators with their signing of the Mayor' Monarch Pledge and looks forward to engaging residents in building more pollinator habitat throughout the city.

Action Items Committed for 2022

Communications and Convening

- Issue a proclamation to raise awareness about the decline of the monarch butterfly and the species' need for habitat. This proclamation must incorporate a focus on monarch conservation.
- Engage with community garden groups and urge them to plant native milkweeds and nectar-producing plants.
- Engage with gardening leaders and partners (e.g., Master Naturalists, Master Gardeners, Nature Centers, Native Plant Society Chapters , other long-standing and influential community leaders) to support monarch butterfly conservation.
- Engage with developers, planners, landscape architects, and other community leaders and organizers engaged in planning processes to identify opportunities to create monarch habitat.
- Create a community art project to enhance and promote monarch and pollinator conservation as well as cultural awareness and recognition.

Program and Demonstration Gardens

- Host or support a native seed or plant sale, giveaway or swap.
- Facilitate or support a milkweed seed collection and propagation effort.
- Plant or maintain a monarch and pollinator-friendly demonstration garden at City Hall or another prominent or culturally significant community location.
- Plant milkweed and pollinator-friendly native nectar plants along roadsides, medians, or public rights-of-way.
- Launch or maintain an outdoor education program(s) (e.g., at schools, after-school programs, community centers and groups) that builds awareness and creates habitat by engaging students, educators, and the community in planting native milkweed and pollinator-friendly native nectar plants (i.e., National Wildlife Federation's Schoolyard Habitats program and Monarch Mission curriculum).

- Add or maintain native milkweed and nectar-producing plants in gardens in the community.

Systems Change

- Increase the percentage of native plants, shrubs and trees that must be used in city landscaping ordinances and encourage use of milkweed, where appropriate.

Action Items

In total, how many individuals have been reached through the Mayors' Monarch Pledge in your community this year (Jan-Dec)? Please limit your answer to only the number of individuals reached in the answer field below (e.g., 50).

377

Of the total number of individuals engaged, how many youth (0-18) were reached through the Mayors' Monarch Pledge in your community this year (Jan. - Dec.)? If none, please write 0." (Only allow numerical values.)

8 youth and 369 adults

In total, how many acres of monarch habitat have been created in your city in the last 12 months? Please limit your answer to only the number of acres in the answer field below (e.g., 3).

2

Where is your habitat being created? This may include residences (yards, containers, balconies, etc.), schools, places of worship, rights-of-way, roadsides, community gardens, culturally-significant locations, shared public spaces and common areas or parks.

Three community Gardens, public right-of-way, and residential homes (butterfly seed balls)

How are you leveraging the Mayors' Monarch Pledge program to engage marginalized communities, such as low-income communities or communities of color?

Yes, through monarch seed ball giveaways and Angleton ISD CATS Academy partnership.

What was your community's motivation for taking and continuing to work on the Mayors' Monarch Pledge?

Improve beautification throughout Angleton and increase awareness of the importance of conservation efforts specifically for Monarch butterflies.

What resources have been most helpful to you thus far and what new resources would you like to see to help meet your goals? What resources would be useful to help expand equitable engagement in community processes and access to high-quality, usable nature?

native planting guidance and informational documents revolved around monarch habitats

What else should we know about your monarch butterfly conservation efforts over the last year?

Surrounding communities are asking how we've implemented these programs so now other communities are getting engaged.

Selected Action Items

Engage with community garden groups and urge them to plant native milkweeds and nectar-producing plants.

Please describe the groups you engaged with and how you engaged with these groups below.

Engage with developers, planners, landscape architects, and other community leaders and organizers engaged in planning processes to identify opportunities to create monarch habitat.

Please describe the extent of engagement with these groups and associated opportunities to create monarch habitat.

Plant or maintain a monarch and pollinator-friendly demonstration garden at City Hall or another prominent or culturally significant community location.

Where is the demonstration garden located and how does this location relate to the cultural significance of the monarch (if relevant)? (Please provide an address or coordinates, if possible)

What community organizations, groups, or leaders (if any) did you partner with or engage to complete this effort?

What is the size of the demonstration garden (in acres)? Please limit your answer to only the number of acres in the answer field below (e.g., 0.5 acres). For reference, 1 acre = 43,560 square feet and is about the size of a football field without the end zones.

Increase the percentage of native plants, shrubs and trees that must be used in city landscaping ordinances and encourage use of milkweed, where appropriate.

What community organizations, groups, or leaders (if any) did you partner with or engage to complete this effort?

What is the status of this action? Please limit your answer to either "complete" or "in progress" in the answer field below.

If this action is Complete, please include the date it was completed and share a 1-2 sentence description. Please include a copy of the policy by uploading or linking below.

If this action is In Progress, please describe your progress and a target date when you plan to complete action.

Issue a proclamation to raise awareness about the decline of the monarch butterfly and the species' need for habitat. This proclamation must incorporate a focus on monarch conservation.

Date of Proclamation:

October 25, 2022

Title of Proclamation (i.e. – Monarch Day or Pollinator Week):

Monarch Butterfly Month

Upload a copy of your proclamation.

[ROW_plants2.jpg](#)

Where are the medians, roadsides and public rights-of-way? (Please provide an address or coordinates, if possible, or describe the location)

The ROW are located in downtown Angleton. We have about 20 planters that we

How many milkweed and pollinator-friendly native nectar plants were planted?

80

What is the total acreage of median and public right-of-way that has been planted with milkweed and pollinator-friendly native nectar plants?

unknown

Please describe the maintenance schedule for these planted areas.

We have 20 downtown planters that we refresh biannually with native nectar plants.

Launch or maintain an outdoor education program(s) (e.g., at schools, after-school programs, community centers and groups) that builds awareness and creates habitat by engaging students, educators, and the community in planting native milkweed and pollinator-friendly native nectar plants (i.e., National Wildlife Federation's Schoolyard Habitats program and Monarch Mission curriculum).

Upload any relevant documents, images, or other attachments related to your effort on this action.

[PBG.jpg](#)

What program was launched or maintained to complete this effort? If you are involved with another National Wildlife Federation program, please mention that below. (Please include a link to the program, if possible)

Angleton city staff recently executed an interlocal agreement with the Angleton Independent School District for improvements to the Peach Street detention area. The district's planned outdoor amenities and facilities will include recreational hiking, walking trails and birdhouses, together with appropriate signage for these amenities. Once completed, The city's contribution included an outdoor butterfly garden including areas dedicated to the cultivation and display of wildflowers for a monarch habitat. The butterfly monarch waystation is in place today. The impact of this venture for the school district will allow children who attend Angleton Changing Attitudes to Succeed (CATS) Academy to get involved in the outdoors for physical, social, and intellectual well-being while also teaching them about responsibility and ownership. Nature play is any activity that gets children active or thinking actively outdoors with the end goal of building the skills and ability to play without the need for parental or adult control. This collaboration is creating a unique space for CATS Academy students to grow and thrive in our community.

How many schools, community groups, leaders, or centers were engaged in this effort? How many of these collaborations and partnerships are "new"?

1

Please list the names of the schools you are working with.

Angleton ISD CATS Academy

What resources, if any, are you providing to educators?

Community garden

How many students and educators would you estimate are being reached? Please limit your answer to only number of adults and youths engaged in the answer field (e.g., 200 students and 20 educators).

100

What community organizations, groups, or leaders (if any) did you partner with or engage to complete this effort?

Dale Hrabovsky

How many acres of monarch and pollinator habitat have been planted through this effort? Please limit your answer to only the number of acres in the answer field below (e.g., 0.5 acres). For reference, 1 acre = 43,560 square feet and is about the size of a football field without the end zones.

.5

What is the maintenance schedule to ensure planted habitat is maintained?

Weekly maintenance

Add or maintain native milkweed and nectar-producing plants in gardens in the community.

Upload any relevant documents, images, or other attachments related to your effort on this action.

[Nectar Planting.jpg](#)

Upload any relevant documents, images, or other attachments related to your effort on this action.
