City of Lake Station

Lake Station, IN

Mayor Bill Carroll

Pledge Summary

The City of Lake Station is committed to protecting and sustaining our local wildlife. Our newly constructed dam has been landscaped with pollen-evasive flowers and plants, helping to support healthy ecosystems while reducing environmental impacts. Throughout the city, we have also installed numerous designated planters filled with a variety of flowers to encourage pollinator activity. We recognize the urgency of supporting the declining monarch butterfly population, and we are dedicated to taking proactive, aggressive steps to do our part in helping preserve this vital species.
